

ALLIANCE
CONTRACTING SOLUTIONS LTD

YOUR TOTAL CONTRACTING SOLUTION

About Alliance Contracting Solutions

Alliance Contracting Solutions, incorporating Alliance Special Projects, is part of the Alliance Group which was formed with the primary objective of successfully establishing a first class Civil Engineering and Construction service delivery to our clients. The reputation of Alliance has grown rapidly with an array of clients being secured throughout the country.

The company goes the extra mile to ensure that successful project outcomes are always achieved whether the project is small or large scale - an approach valued by our clients.

Our Approach

Innovation

An integral part of Alliance Contracting project delivery is the integration of a comprehensive review of all possible aspects to ensure that the desired result is achieved. This includes questioning the appropriateness of the 'standard' approach and considering alternatives that may present a more economical and effective solution for the Client in the long term.

Risk Minimisation

Financial and physical risks are reduced through the knowledge and experience of Alliance people and the technology available to the company. These include industry standard Computer Aided Drafting (CAD) and modelling software, together with survey equipment such as Ground Penetrating Radar (GPR), Global Positioning Systems (GPS) and Closed Circuit Television (CCTV). Alliance Contracting Solutions works closely with Alliance Consulting Solutions, providing a combination of skills which enables us to deliver consistent, low risk project solutions.

Health, Safety and Environment

All of the Contracting Team are conversant with the requirements of current legislation and have developed a comprehensive knowledge of construction techniques to enable all Health, Safety and Environmental risks to be considered fully during the design process. We also hold ISO 9001, ISO 14001 and BS OHSAS 18001 accreditations in respect of our management systems. Alliance Contracting Solutions is also CHAS and UVDB Verify accredited.

We have a strong working relationship with Alliance, built over a number of years. Providing high quality workmanship to their Repair & Maintenance contract whilst delivering on a number of larger scale projects on our water and wastewater assets, they have shown excellent service along with great professionalism, flexibility and understanding whenever required.

Ben Halliwell, Severn Trent Services

Our Expertise

Alliance Contracting Solutions delivers a wide array of services to both public and private sector Clients on a both long-term framework and individual project basis.

These are some of the services that we are able to provide for our Clients.

About Lee Mellors

Director Alliance Contracting Solutions Limited

Lee has a wealth of operational experience gained through working at all levels within construction initially from site operative through Contract Manager to his current Director status. He holds commanding and comprehensive experience of construction infrastructure creation.

He has developed an excellent knowledge of operational repair and maintenance within all of our business sectors and is known for his first class approach to problem solving, particularly within the water sector, providing Clients with a complete service provision both within and outside of normal working hours.

Lee consistently delivers exemplary standards in terms of safety, health, environmental and quality outcomes.

About Alliance Group Solutions Limited

The Alliance Group, comprising Alliance Contracting Solutions, Alliance Flood Solutions and Alliance Consulting Solutions, was formed with the primary objective to deliver first class Civil Engineering and Construction services to both the public and private sectors. While covering the built and natural environment, our skills have developed from a strong water based business background where we have developed an enviable professional reputation. Combining contracting and consulting skills, we have the capability to deliver the whole or any part of a project lifecycle, within budget and on time, together with a wealth of experience in carrying out and completing projects for a vast range of clients throughout the UK.

About Alliance Special Projects

Alliance Special Projects - part of Alliance Contracting Solutions Limited - focuses on the delivery of smaller scale projects where client resources are often limited in terms of finance and time. Whether the commissions involve the replacement of a simple inspection cover or the design and construction of a new car park or an innovative large scale vehicle wash, we deliver what we promise.

We add significant value that goes beyond the sector norms in pursuit of excellence. Through continuous improvement, we aim to exceed expectations by encouraging teamwork and sector-leading excellent solution delivery.

Our Expertise

Alliance Special Projects delivers a wide array of services to both public and private sector Clients on a both long-term framework and individual project basis.

Alliance people are the greatest asset through their qualifications, experience, commitment and energy. They are passionate about our business, set ambitious targets and drive to exceed them. Alliance continuously delivers an excellent service. These are some of the services we are able to provide for our Clients.

- Car parks
- Drainage
- Footways
- Highways
- Infrastructure projects
- Oil and water interceptors
- Pumping stations and ancillary structures
- Sewerage
- Street Furniture
- Structures (foundations, gabions, piling, repairs, walls, structural slabs)
- Sustainable Urban Drainage Solutions (SUDS)
- Water, water efficiency and water treatment
- Watercourses and water features

Additionally, we deliver planned and reactive repair and maintenance services on a 24/7/365 basis.

Customer expectations and delivery standards are at the core of our beliefs; we also have high expectations from our people in terms of safety, health, environment and quality outcomes.

"Alliance has carried out cost effective reservoir dam safety work for Nottingham City Council on two recent occasions. The work included gabion repairs, ditch clearance, toe drainage and water sampling points. They were enthusiastic about tackling unusual work regardless of its size and the customer care shown by their workforce and management was excellent"

Paul Daniels: Senior Drainage Engineer - Nottingham City Council

About Jason Gregory

Director Alliance Special Projects

Jason has developed a unique and intuitive approach whilst dealing with the requirements of his Clients. Within the Special Projects market, when financial and time related client requirements are often under pressure, Jason has the ability to consider the options available to meet the required outcomes whilst maintaining a watchful eye on the project budget and programme.

He holds commanding and comprehensive experience of repair and maintenance and asset creation. Jason is known for his first class approach to problem solving, providing clients with a complete service provision, both within and outside of normal working hours.

He is also the company lead in respect of Health and Safety.
